EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Dennis Flaherty on 01/21/05.

The application has been amended as follows:

The following changes to the drawings have been approved by the examiner and agreed upon by applicant: labeled Figures 1 and 3 as "PRIOR ART". In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

The following is an examiner's statement of reasons for allowance:

The following is a statement of reasons for the indication of allowable subject matter: the art of record fails to disclose a device/method for converting elapsed time into voltage and/or a device/method of time stamping an event having a first and a second clock signal as claimed in claims 1, 13, 19, 20 and 28 in conjunction with the alternating interludes and with the remain limitations of those claims above, nor would it be obvious to modify the art of record so as to include the above limitations. Although Sasaki et al. [US 5,122,996] disclose a first and second time clock signal [312 and 314] in a time-interval to voltage converter and Tsunakawa et al. [US 4,928,184] disclose a

plurality of time clock signal [42, 45 and 46] in an image recording system, they do not disclose the time clock signals in the operational structured as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
